# 1 The SpeedTouch™330 R2.0

---

|                |   |
|----------------|---|
| Introduction   | The purpose of this document is to define the released items and provide delivery information of the SpeedTouch™330 ADSL USB modem Release R2.0.  |
| General        | This delivery introduces the SpeedTouch™330 Release R2.0 ADSL USB modem as an addition to the existing range of THOMSON multimedia's DSL products.  |
| Key features   | <p>The SpeedTouch™330 R2.0 key features are:</p> <ul style="list-style-type: none"><li>• Introduction of a new product, called SpeedTouch™330</li><li>• Focused on demanding High-speed Internet users. Specially designed for:<ul style="list-style-type: none"><li>• High quality video applications</li><li>• Faster downloads</li><li>• Seamless integration with most popular multimedia applications</li></ul></li><li>• USB Bus supports:<ul style="list-style-type: none"><li>• Bulk mode (current/default mode)</li><li>• 2 Isochronous modes: 5.1Mb/s and 7.6Mb/s guaranteed bandwidth (actual bandwidth depends on bandwidth provisioning)</li></ul></li><li>• Up to 8Mb/s downstream, 832kb/s upstream for ADSL/POTS</li><li>• Full WHQL compliancy for Microsoft Windows XP</li><li>• The software features backwards compatibility with the SpeedTouch™USB ADSL/POTS and SpeedTouch™USB ADSL/ISDN USB modems.</li></ul> |
| Basic features | <p>The key features come on top of the DSL data features delivered by THOMSON multimedia's range of existing SpeedTouch™ USB software releases for Microsoft Windows Operating Systems.</p> <p>For a complete presentation of the product's features please check the SpeedTouch™330 Data sheet.</p>  |

## 2 Release History

### 3.3 Software Versions

---

Platform Software

| ADNU-C Software Components      |             |         |
|---------------------------------|-------------|---------|
| Component                       | Item number | Remarks |
| Windows OS software             | GJ2EAA2.007 | R2.0    |
| Profiler application            | GNGEAA2.001 | R2.0    |
| Windows Web Upgrade application | KUUUAA2.007 | R2.0    |

## 4 Restrictions

### 4.1 Microsoft Windows OS Driver Restrictions

#### **1. Upgrading the PC's OS from MS Windows 98 to MS Windows 2000 or MS Windows XP.**

---

Problem After upgrading the PC's OS, the SpeedTouch<sup>TM</sup>330 drivers stop to function correctly.

---

Workaround Re-install the SpeedTouch<sup>TM</sup>330 drivers on your MS Windows 2000 or MS Windows XP PC.

---

#### **2. A third Party PPPoE client connection is lost after exiting suspend mode.**

---

Problem If the PC exits suspend mode, the third party PPPoE client application erroneously displays the connection to be up and running.

---

Workaround Close and re-open the PPPoE client connection.

---

#### **3. UHCI USB host controller problem.**

---

Problem The SpeedTouch<sup>TM</sup>330 drivers do not work on MS Windows 2000 dual processor systems using a VIA UHCI USB host controller chip.  
On MS Windows XP systems this is no longer a problem.

---

Workaround 1 Use a PCI plug-in OHCI USB card.

---

Workaround 2 Upgrade the MS Windows 2000 system to MS Windows XP.

---

#### **4. The MS Microsoft Windows VPN (ATM) adapter can not run on top of the SpeedTouch<sup>TM</sup>330.**

---

Workaround None.

---

**5. Windows 2000 and Windows XP Interleaved mode ADSL line throughput problem with line speeds > 4.2Mb/s.**

---

**Problem** The maximum throughput of the SpeedTouch<sup>TM</sup>330 operating on an Interleaved mode ADSL line with a line speed > 4.2Mb/s is limited to maximum 3Mb/s on Windows 2000 and Windows XP systems.  
In Fast mode there is no problem.

---

**Workaround** The problem is caused by the Operating System's TCP window size settings.  
Changing the TCP windows size from 32k to 42k solves the problem.

---

## 4.2 Profiler/Customization Restrictions

### I. Silent installation restriction.

---

**Problem** In case a fresh installation is started from a customized CD-Rom with the following customization settings: Gui=0, Install=0, Upgrade=0 and Remove=0 in the setup.ini file, the installation will fail.

---

**Workaround** Use the following settings in the setup.ini file instead for a correct behavior: Gui=0, Install=1, Upgrade=1 and Remove=1.

---
